MARK SCHEME

Maximum Mark: 80

Published

This mark scheme contains the instructions and marking guidance that our examiners used to mark candidate responses for this component.

Before they start marking, examiners complete a standardisation process. They review a range of candidate responses and discuss the mark scheme in detail to agree which answers can and cannot be accepted. Examiners award marks where it is clear that candidate responses have met the requirements of the mark scheme. These requirements may vary between different components or different versions of the same component, depending on the exact requirements of the question and the candidate responses seen during the standardisation process.

Sometimes, our mark schemes may allow marks to be awarded to responses which contain elements that are factually incorrect or for content not covered by the syllabus. We do this in response to the demands of a specific question to support candidates and make sure that our assessments are fair. However, these allowances should not be used as a guide for teaching and learning.

We cannot discuss the mark scheme with schools, and we recommend that schools read the mark scheme together with the assessment material and the Principal Examiner Report for Teachers.

This document consists of **17** printed pages.

General marking principles

All examiners must apply these marking principles when marking candidate responses.

1	Examiners must award marks for each response in line with: - the specific content defined in the mark scheme - the specific skills defined in the mark scheme or in the level descriptions - the standard of response required as exemplified by the standardisation scripts.
2	Examiners must award whole marks (not half marks, or other fractions).
3	Examiners must award marks positively . This means that: - marks are not deducted for errors or omissions - marks are awarded for correct/valid answers as defined in the mark scheme and also for other valid answers which go beyond the scope of the syllabus and mark scheme referring to your team leader as appropriate - the quality of spelling, punctuation and grammar are judged only when the mark scheme indicates that these features are specifically assessed in the question. However, the meaning of all responses must be unambiguous.
4	Examiners must consistently apply the requirements of the mark scheme and any rules for what to do when candidates have not followed instructions correctly.
5	Examiners must use the full range of marks defined in the mark scheme, unless limited by the quality of the candidate responses seen.
6	Examiners must award marks according to the mark scheme and must not award marks with grade thresholds or grade descriptions in mind.

Science-Specific Marking Principles

1	Examiners should consider the context and scientific use of any keywords when awarding marks. Although keywords may be present, marks should not be awarded if the keywords are used incorrectly.
2	The examiner should not choose between contradictory statements given in the same question part, and credit should not be awarded for any correct statement that is contradicted within the same question part. Wrong science that is irrelevant to the question should be ignored.
3	Although spellings do not have to be correct, spellings of syllabus terms must allow for clear and unambiguous separation from other syllabus terms with which they may be confused (e.g. ethane / ethene, glucagon / glycogen, refraction / reflection).
4	The error carried forward (ecf) principle should be applied, where appropriate. If an incorrect answer is subsequently used in a scientifically correct way, the candidate should be awarded these subsequent marking points. Further guidance will be included in the mark scheme where necessary and any exceptions to this general principle will be noted.
5	<u>'List rule' guidance</u> For questions that require <i>n</i> responses (e.g. State two reasons ...): • The response should be read as continuous prose, even when numbered answer spaces are provided. • Any response marked <i>ignore</i> in the mark scheme should not count towards <i>n</i>. • Incorrect responses should not be awarded credit but will still count towards <i>n</i>. • Read the entire response to check for any responses that contradict those that would otherwise be credited. Credit should not be awarded for any responses that are contradicted within the rest of the response. Where two responses contradict one another, this should be treated as a single incorrect response. • Non-contradictory responses after the first <i>n</i> responses may be ignored even if they include incorrect science.

6 Calculation specific guidance

Correct answers to calculations should be given full credit even if there is no working or incorrect working, **unless** the question states 'show your working'.

For questions in which the number of significant figures required is not stated, credit should be awarded for correct answers when rounded by the examiner to the number of significant figures given in the mark scheme. This may not apply to measured values.

For answers given in standard form (e.g. $a \times 10^n$) in which the convention of restricting the value of the coefficient (a) to a value between 1 and 10 is not followed, credit may still be awarded if the answer can be converted to the answer given in the mark scheme.

Unless a separate mark is given for a unit, a missing or incorrect unit will normally mean that the final calculation mark is not awarded. Exceptions to this general principle will be noted in the mark scheme.

7 Guidance for chemical equations

Multiples / fractions of coefficients used in chemical equations are acceptable unless stated otherwise in the mark scheme.

State symbols given in an equation should be ignored unless asked for in the question or stated otherwise in the mark scheme.

Annotations guidance for centres

Examiners use a system of annotations as a shorthand for communicating their marking decisions to one another. Examiners are trained during the standardisation process on how and when to use annotations. The purpose of annotations is to inform the standardisation and monitoring processes and guide the supervising examiners when they are checking the work of examiners within their team. The meaning of annotations and how they are used is specific to each component and is understood by all examiners who mark the component.

We publish annotations in our mark schemes to help centres understand the annotations they may see on copies of scripts. Note that there may not be a direct correlation between the number of annotations on a script and the mark awarded. Similarly, the use of an annotation may not be an indication of the quality of the response.

The annotations listed below were available to examiners marking this component in this series.

Annotations

Annotation	Meaning
	correct point or mark awarded
	incorrect point or mark not awarded
	information missing or insufficient for credit
	incorrect or insufficient point ignored while marking the rest of the response
	contradiction in response, mark not awarded
	benefit of the doubt given
	error carried forward applied
	First answer
	response has not answered question
	power of ten error

Annotation	Meaning
	point has been noted, but no credit has been given or blank page seen
	response is too vague or there is insufficient detail in response
	repetition in response
	to show a correct point but where the number of points does not relate to the number of marks i.e. 3 correct = 2 marks
	correct awarding one mark from marking point or marking group 1. similar numbered ticks are used for marking point or marking groups 2, 3, 4 etc.
Highlighter	Highlight

Mark Scheme Abbreviations

Abbreviation	Meaning
;	separates marking points
/	alternative responses for the same marking point
R	reject the response
A	accept the response
I	ignore the response
ecf	error carried forward
AVP	any valid point
ora	or reverse argument
AW	alternative wording
<u>underline</u>	actual word given must be used by candidate (grammatical variants excepted)
()	the word / phrase in brackets is not required but sets the context
max	indicates the maximum number of marks that can be given
M1, M2....	marking point reference

Question	Answer	Marks	Guidance
1(a)	<i>any two from:</i> M1 mostly north of the Equator ; M2 in every continent ; M3 in stated country / continent ;	2	ignore above or below M2 accept scattered across the world M3 accept most of Central America / very little in Australia M4 allow mainly found in desert regions
1(b)	<i>any three from:</i> M1 reduces soil fertility ; M2 topsoil removed ; M3 plants/seeds will not grow ; M4 crops die/crop failure / reduced crop yield ; M5 no food for livestock / livestock die ; M6 food shortages ;	3	M1 accept loss of minerals / nutrients M2 accept cause desertification M6 accept food insecurity / no food / increase in food prices
1(c)(i)	<i>any two from:</i> M1 light controlled ; M2 temperature controlled ; M3 water / irrigation controlled ; M4 nutrients controlled ; M5 humidity controlled ; M6 reduces pests / disease ; M7 increase yields / can harvest more than once / longer growing season ;	2	ignore easier to monitor / care for ignore more sunlight accept ORA for outside greenhouse M6 accept pathogens or named pest / disease M7 accept less space taken allow controlled condition if no named condition is mentioned.
1(c)(ii)	<i>any two from:</i> M1 plants grown using water ; M2 does not use soil ; M3 nutrients dissolved in water ;	2	ignore irrigation

Question	Answer	Marks	Guidance
2(a)	M1 5.4 AND 2.7 ; M2 2.7 ;	2	correct answer = 2 marks M2 ecf on M1
2(b)	contraception use increases as number of children born decreases ;	1	ignore correlated accept ORA accept inverse relationship
2(c)	M1 bars plotted at: 25–29 = 310 000 AND 30–34 = 270 000 ; M2 bars of equal width AND distance between each bar equal ;	2	ignore shading

Question	Answer	Marks	Guidance
3(a)	A: evaporation ; B: through flow ;	2	Reject B: ground water flow ignore infiltration / surface run-off / run-off
3(b)(i)	50 ;	1	
3(b)(ii)	key completed in this order: soil lakes swamps rivers atmosphere all correct = 1 mark	1	
3(b)(iii)	<i>any two from:</i> M1 ice sheets ; M2 glaciers ; M3 ground water ;	2	reject oceans / sea ignore soil, lakes, swamps, rivers, atmosphere ignore streams ignore underground ignore rain M2 accept permafrost / icebergs M3 accept springs / aquifers

Question	Answer	Marks	Guidance
4(a)	<i>any two from:</i> M1 (floating/physical) barrier ; M2 slows the spread oil ; M3 contains oil / keeps oil in one area ;	2	reject it catches the oil M3 accept trap the oil / reduced area of spill
4(b)	<i>any two from:</i> M1 delayed response in dealing with oil spill ; M2 quantity of oil spill too large or spread out / coastline / Singapore, too large to surround by booms ; M3 rough weather causes oil to wash over boom ; M4 some (heavy) oil sinks below the boom ;	2	M2 ORA booms too small M3 accept waves / currents / tides M5 allow poor quality boom design / damage to boom
4(c)	oil is toxic ;	1	ignore protects clothes accept harmful / poisonous / dangerous accept protects skin accept damages skin
4(d)	<i>any two from:</i> M1 (off-shore) extraction ; M2 leakage / poor maintenance of pipeline or ships / mechanical failure ; M3 shipping accident ; M4 cleaning tanks ; M5 deliberate action ;	2	 M3 accept grounded / human error M5 accept illegal discharge M6 allow natural disasters / extreme weather qualified e.g. hurricane, earthquakes, volcanic eruptions
4(e)	<i>any two from:</i> M1 double-hulled oil tankers ; M2 detergent sprays ; M3 skimmers ;	2	accept burning accept absorbents accept bioremediation

Question	Answer	Marks	Guidance
4(f)(i)	M1 24.5 AND 9.5 / 61.2 ; M2 61 ;	2	correct answer = 2 marks M1 accept 15 / 24.5 M2 ecf awarded if incorrect values for M1 identified and these values used to calculate the percentage difference AND answer expressed to 2 sig fig
4(f)(ii)	supports: oil spills have decreased ; does not support : only shows data for large spills / does not include information on spills less than 630 tonnes / last bar is only for 3 years or is not a 10 year period ;	2	allow relevant quoted data

Question	Answer	Marks	Guidance
5(a)(i)	Oceania ;	1	
5(a)(ii)	Asia ;	1	
5(a)(iii)	360 000 ;	1	accept 350 000 to 370 000
5(a)(iv)	<i>any one from:</i> M1 people live in remote areas ; M2 no access to medical facilities ; M3 cholera not diagnosed ;	1	ignore cultural remedies / self-medicate M2 accept cost of medical treatment M4 allow no family members to report death or illness M5 allow cultural stigma M6 allow no symptoms seen / asymptomatic
5(b)(i)	<i>any one from:</i> reservoirs ; lake ;	1	ignore rainwater harvesting / rivers / wells allow water barges / water towers / dam / tanks

Question	Answer	Marks	Guidance
5(b)(ii)	malaria / bacteria / named disease ;	1	ignore flooding / cholera allow drowning allow pathogens / parasites allow algal growth allow water pollution / named contaminants / faeces
5(b)(iii)	provides water in times of drought or water shortage ;	1	Ignore emergency unqualified allow natural disasters allow provides water security
5(b)(iv)	to remove, particles / solids / named solid e.g. soil or rocks ;	1	ignore molecules
5(b)(v)	chlorination / addition of chlorine ;	1	Ignore chemicals allow <u>boiling</u> / UV / ozone / addition iodine
5(b)(vi)	<i>any two from:</i> M1 less money (to invest in distribution) ; M2 less infrastructure ; M3 less expertise / technology ; M4 people live in remote areas ;	2	ignore cost/expensive unqualified M1 accept poor maintenance M2 accept named examples e.g. pipes, treatment works M3 accept low skilled workers

Question	Answer	Marks	Guidance
6(a)	<i>any five from:</i> M1 decrease in biodiversity / extinctions ; M2 loss of, shelter / habitat / shade ; M3 loss of food / food chains disrupted ; M4 reduction in genetic diversity ; M5 loss of carbon sinks or stores ; M6 less photosynthesis / less carbon dioxide removed from atmosphere ; M7 increase risk of flooding ; M8 increase risk of soil erosion ; M9 loss of (potential) medicines or stated resource ;	5	 <

Question	Answer	Marks	Guidance
6(c)	<i>any three from:</i> M1 timber extraction / logging ; M2 farming / agriculture ; M3 settlements / house building ; M4 roads / infrastructure ; M5 mineral extraction ;	3	ignore pests / diseases ignore population growth M1 accept demand for wood M3 accept urbanisation M6 allow wildfires / forest fires M7 allow climate change / global warming
6(d)	M1 the width of the bar represents the numbers of organisms / number of organisms at each trophic level ; <i>any three from:</i> M2 oak tree is producer ; M3 aphid / beetle / sparrow, are consumers ; M4 aphid is, primary (consumer) ; M5 beetle is, secondary (consumer) ; M6 sparrow is, tertiary (consumer) / top predator ; M7 there are four trophic levels / named organism at specified trophic level ;	4	ignore flow of energy M1 accept length for width M4 accept herbivore M5 accept carnivore M6 accept apex carnivore M8 allow 1 mark for comparison of numbers.
6(e)	<i>any three from:</i> M1 temperature ; M2 humidity ; M3 water ; M4 oxygen ; M6 carbon dioxide ; M7 salinity ; M8 sunlight ; M9 pH ;	3	 M8 accept light M10 allow wind (speed) M11 allow mineral ions

Question	Answer	Marks	Guidance
7(a)	<i>any two from:</i> M1 overall decreasing ; M2 fluctuations ; M3 levels off ;	2	M2 accept descriptions of fluctuations
7(b)	CFC / chlorofluorocarbons (in the atmosphere) ;	1	allow other correct examples. e.g. chlorine / hydrochlorofluorocarbons / HCFCs / carbon tetrachloride / CCl ₄ / HBFCs / hydrobromofluorocarbons
7(c)	M1 higher levels of UV (radiation) reach Earth's surface ; M2 damage to vegetation ; M3 cancer ; M4 cataract ;	4	ignore harms ignore vegetation loss / death of plants ignore skin burns M5 allow DNA mutations
7(d)	M1 all countries produced or used, ozone depleting substances or CFCs ; M2 ozone layer depletion affects all countries / no boundaries in atmosphere ;	2	
7(e)	<i>any two from:</i> M1 idea that it does not deal with the cause or source of pollution ; M2 rich can pay to pollute ; M3 unfairly impacts LEDCs ;	2	M2 accept ORA M4 allow prices of goods / services may increase M5 allow difficulty enforcing M6 allow idea that some people think that some processes should be exempt from taxation

Question	Answer	Marks	Guidance
7(f)	<i>Level of response marked question:</i> <u>Level 3</u> [5–6 marks] A coherent response is given that develops and supports the candidate's conclusion using relevant details and examples. Indicative content and subject-specific vocabulary are generally used precisely and accurately. Good responses are likely to present a balanced evaluation of the statement. <u>Level 2</u> [3–4 marks] Development and support of the conclusion is evident, though the response may lack some coherence and / or detail. Irrelevant detail may be present. Indicative content and subject-specific vocabulary are used but may lack some precision and / or accuracy. Responses contain evaluation of the statement, but this may not be balanced. <u>Level 1</u> [1–2 marks] The response may be limited in development and / or support. Contradictions and / or irrelevant detail may be present. Indicative content and subject-specific vocabulary may be limited or absent. Responses may lack structure or be in the form of a list. Evaluation may be limited or absent.	6
